Additional Details

“Custom Data Analysis & Excel Spreadsheets” solves the Profit and Surplus Revenue Equation through assisting your Business and Organization in securing powerful Data Analytical Tools.

Excel can be used for cleaning and analyzing simple to moderately complex Data for all size Businesses and Organizations.

Our Team is equipped to assist your team in leveraging MS Excel Spreadsheets for ad hoc Analytics, Custom MS Power BI Dashboards, Non-MS BI tools for Budget Analysis, Trend Analysis, TCO's, KPI tracking and much much more.

For medium to complex Data Analytics involving larger Data Sets a true BI (Business Intelligence) System such as Netsuite BI, SAP, Microsoft Power BI, Qlik, Sisense, Tableau, SAS, or equivalent will be recommended.

“Could you build a home without Tools?”

“Start building Profit and Surplus Revenue with the Tools you need!”
